Symbl.ai
1201 3rd Avenue, Suite 2200, Seattle, WA, USA

Dear Hiring Manager,

   I am excited to apply for the Machine Learning Engineering Intern position at Symbl.ai. With a strong academic background in machine learning and natural language processing, coupled with hands-on experience in developing large-scale machine learning solutions, I am eager to contribute to the innovative projects at Symbl.ai.

   In my current role as a Research Assistant at Old Dominion University, I have been actively involved in developing machine learning applications that enhance model performance on challenging datasets for imbalanced datasets for classification problem in tabular and image domain. Also, I have hands-on project experiences include creating a ChatBot, agentic AI and other projects utilizing Large Language Models, where I implemented techniques such as advabced retrieval-augmented generation and other techinques, which aligns seamlessly with the development of the Nebula LLM. Additionally, I have substantial experience with Python and various ML libraries, such as TensorFlow and PyTorch, which I utilized to tackle complex classification problems and improve model robustness. My GitHub repositories showcase my ongoing exploration in generative AI, and my passion for pushing the boundaries of language technology complements Symbl.ai's mission to redefine AI interactions.

   I am truly enthusiastic about the opportunity to join Symbl.ai and contribute to the transformative work you are doing in conversation intelligence. I look forward to the possibility of discussing how my skills and experiences can be a valuable addition to your team. Thank you for considering my application.

   Warm regards,
Mory Gharasuie
